CryptoTaxEdge — for Accountants

Classify any crypto transaction in under a second. With a verifiable receipt.

Built for the firm with 10–100 crypto clients

Spending 15–40 hours per client per year manually reviewing DeFi positions? Entering tx hashes into Etherscan, then guessing whether that `0x38ed1739` is a swap, an LP exit, or a vesting unlock? **You're our customer.**

What you get

Classification Explorer — Enter a transaction hash. Get type · Koinly action · tax category (income / disposal / non-taxable) · confidence score · reasoning. Average response: under 1 second.

Portfolio Analytics — Scope a client engagement before you quote. Connect a wallet (enter address or ENS like `vitalik.eth`) to instantly see transaction volume, active chains, and protocol interactions across 700+ DeFi protocols recognized. Turns hours of manual triage into a 15-minute scoping pass — built for accurate engagement pricing, not for cost-basis or gain/loss reporting. Multi-wallet at the Firm tier (up to 5 per client).

Live TX Classifier — Chrome extension. One-click classification on Koinly, CoinTracker, CoinLedger, ZenLedger, Blockpit, Cryptio, TokenTax, Breezing, and 14 more tax platforms. Verdicts auto-fill the Koinly classification field. Local hot-path cache hits in 0ms.

CTE for AI agents — Use Claude Desktop, Cursor, or ChatGPT? Ask your agent to classify any transaction — it queries our engine and brings the verdict back into your existing workflow.

Why CPAs trust it

- **Multi-source consensus.** Every classification is cross-checked across four independent data providers. Conflicts are flagged with reasoning — never silently guessed.
- **IRS-cited rules.** 850+ live rules, each linked to a Revenue Ruling, IRS Notice, or case (Rev Rul 2023-14 for vesting, Notice 2014-21 for staking, IRS FAQ for forks).
- **Confidence transparency.** Every verdict shows its confidence (0–100%). When sources disagree, you see the conflict and the adjudicator's reasoning — never silent guessing.
- **Verifiable receipts** *(roadmapped Q3 2026)*. Every classification produces a timestamped, cryptographically-signed JSON artifact you can attach to your engagement files. Verifiable at `cryptotaxedge.com/verify`.
- **Patent pending** on the consensus engine.

Pricing — Founder rate ends May 31, 2026

Tier	Founder rate	Standard (June 1)	Includes
Free	$0	—	25 classifications/mo · 5 wallet analyses/mo · single wallet
Pro	$79/mo	—	Unlimited classifications · single-wallet Portfolio Analytics · Chrome extension
Firm	**$199/mo + $59/seat**	$249/mo + $79/seat	Pro × team · multi-wallet PA · per-client switcher · 2 seats included · 50K MCP calls pooled
Firm+ *(Q1 2027)*	—	$399/mo	Firm + firm-scoped rules + enterprise SLA

Founder cohort: first 30 firms, through May 31. Rate locks **indefinitely** with continuous renewal.

Setup time

- Sign up + first classification: under 60 seconds
- First client wallet connected: under 5 minutes (enter address or ENS)
- Chrome extension installed: one click
- First scoping report: 15 minutes (replaces 4–8 hours of manual review)

By the numbers

2.1M+ classifications cached · 850+ IRS-cited rules · 82 chains · 412K+ contracts · 700+ DeFi protocols · 22 platform integrations
